RE: Referral Morpac Mechanical Ltd.

To whom it may concern:

This letter serves as confirmation that Morpac Mechanical Ltd. has successfully completed multiple projects as our subcontractor. The management team of John and Pino are well equipped to handle the most complex scenarios. Their construction foremen James and Frank have always been great to deal with and their safety record with us is unblemished.

Here is a list of larger projects that Morpac has successfully completed for us recently:

2017:

- 42 Unit Mixed Use Residential / Commercial Building; 4 Storey woodframe.
 - The scope of work was complete mechanical including Plumbing / HVAC / Natural Gas.

2016:

- 22 Unit Residential Renovation.
 - The scope of work included complete Drainage Repipe, Domestic Water Re-Pipe, Hydronic Heating Repipe, and Boiler Retrofit.
- 10,000 SQFT Light Industrial Concrete Tilt-up
 - The scope of work included Plumbing / HVAC / Natural Gas

With these, and other successes we have achieved together we intend to continue subcontracting projects to Morpac as they have our full confidence in competence, execution and reliability. I personally highly recommend the services of Morpac Mechanical Ltd. as your commercial mechanical contractor.

Thank You

Nick (Nikola) Bratanic
